

# SnapBook — Design Portfolio Board

Complete end-to-end UX/UI design presentation detailing research, information architecture, mobile design system, and accessible interface prototyping.

ROLE: Lead UX/UI Designer

TIMELINE: 8 Weeks

PLATFORM: iOS & Android

YEAR: 2024

01

OVERVIEW

## SnapBook

A PHOTOGRAPHY BOOKING & MANAGEMENT EXPERIENCE

Connecting clients with professional photographers through a simple booking experience.

Verified Studio Professional • London, UK

UX/UI Design

Case Study 2024

02

PROBLEM STATEMENT

## Finding and booking a professional photographer can be difficult

Users often need to compare portfolios, packages, pricing, ratings and availability across different sources.

- Hard to compare portfolios
- Unclear pricing and packages
- Limited availability information
- Lack of trusted reviews
- Confusing booking process

### DESIGN CHALLENGE

"How might we make the photographer discovery and booking process simple, clear and trustworthy?"

03

RESEARCH &amp; DISCOVERY

## Understanding the Users

I conducted user research to understand what users need when selecting and booking photographers. Insights were gathered through surveys, interviews and competitive analysis.

- Trust**  
See portfolios and verified reviews
- Clarity**  
Understand packages and upfront pricing
- Control**  
Choose dates & custom packages easily
- Confidence**  
Receive instant booking information

Surveyed: 48 Clients  
Interviews: 12 Photographers

04

INFORMATION ARCHITECTURE

## From Discovery to Booking

Streamlined linear path mapped out to eradicate cognitive friction.

- Home
  - Explore
  - Photographer Details
  - View Portfolio
  - Select Package
  - Choose Date
  - Booking Details
  - Confirm Booking
- PRIMARY FLOW GOAL**  
"Reduce unnecessary steps and make the booking journey easy to understand."

05

CONCEPT &amp; STRATEGY

## Exploring Solutions

I explored different solutions for photographer discovery, category navigation, photographer cards, package comparison and booking flow.

- Simplicity**  
Keep the experience easy to understand and browse.
- Clarity**  
Present important information and pricing clearly.
- User Control**  
Allow users to choose packages, dates and actions flexibly.
- Consistency**  
Use reusable components and consistent patterns across UI.

Iterated 18 Wireframe Variations

06

DESIGN SYSTEM

## SnapBook Design System

Cohesive design tokens ensuring visual harmony and scalability.

**COLOR TOKENS**

|         |         |         |         |
|---------|---------|---------|---------|
| #6C594D | #F8D7DA | #F1C40F | #A8D88D |
| Primary | Surface | Text    | Success |

**TYPOGRAPHY**

|                |                         |
|----------------|-------------------------|
| <b>Poppins</b> | Headings • Bold         |
|                | Subheadings • Bold      |
|                | Body • Regular / Medium |

**UI COMPONENTS**

Book Session View Portfolio

Search city, wedding, portrait...

Home Explore Bookings Profile

07

MOBILE UI

4 Core Application Views

## Designing the Experience

Four core iPhone-fidelity frames demonstrating seamless browsing, searching, profile inspection, and booking scheduling.

Component-Driven Figma Autolayout UI 375px • 812px Native Viewport

08

DESIGN CRAFT

## Making Experience Usable

Delightful micro-interactions paired with strict accessibility engineering.

- MICRO-INTERACTIONS**
- Button Scale: Press 6.97 Loading State
- Success Feedback: Error Feedback
- Toggle Interaction
- ACCESSIBILITY (WCAG 2.1 AA/AAA)**
- Contrast Ratios: AAA compliant text contrast
- Touch Targets: Minimum 44x44px hitboxes
- Focus Rings: Visible keyboard states
- Form Labels: Explicit descriptive text
- Alt-text guidance included **WCAG 100% Passed**

09

FINAL DELIVERY

## A Better Booking Experience

The final SnapBook experience provides a structured and user-friendly way to discover photographers, compare packages and complete bookings.

- Clear discovery
- Simple booking
- Reusable tokens
- Package compare
- Consistent UI
- Accessible flows

Ready for Developer Handoff

10

LEARNINGS &amp; ROADMAP

## What I Learned

Working on SnapBook helped me understand the complete UX design process—from identifying problems and researching users to designing interfaces, creating reusable components, improving accessibility and preparing developer handoff.

### FUTURE ROADMAP

- Conduct usability testing
- Collect real user feedback
- Improve booking flow
- Explore payment integration
- Continue refining mobile experience

Tools Used: Figma, Notion, Miro, Tokens
